PHARMACOLOGY REVIEW SHEET

- Review Respiratory Care drugs (see medication grid): categories, undiluted dosages, % solutions, trade names, frequencies: Q4°-bronchodilators, QID-steroids, others per grid
- ightharpoonup Properties of ∞ , β-1 and β-2 (heart, blood vessels, smooth muscles)
- > Differences between adverse reactions and side effects
- > Steps to take in case of an adverse reaction (HR 1 20 beats):
 - 1. Stop therapy.
 - 2. Monitor vital signs and stabilize patient.
 - 3. Call R.N. and Respiratory Care Charge Therapist.
 - 4. Document incident completely per policy.
- > Formulas for drug calculations
 - 1. $mL = (mg \div \% \div 10)$ How many mL are in 5 mg of 20% solution?

$$mL = (5 \div 20 \div 10) = 0.025 \, mL$$

2. $mg = (mL \times \% \times 10)$ How many grams are in 5 mL of 10% solution?

$$mg = (5 \times 10 \times 10) = 500 mg$$

 $g = (500 mg \div 1000) = 0.5 g$

3. (V1C1 = V2C2) What is the concentration of a 6%, 10 mL solution if 2 mL are added?

$$(10 \times 6) = (12X)$$

 $60 = (12X)$
 $5\% = X$

4. % solution = [(grams ÷ mL) × 100] Change 1:300 to % solution:

$$[(1 \div 300) \times 100] = 0.33\%$$

RESPIRATORY CARE MEDICATION REVIEW

CHEMICAL NAME	TRADE NAME	CLASSIFICATION	DOSAGE	FREQUENCY	NOTES
Albuterol Sulfate	Proventil	"S" and "R" isomer	2.5-10 mg*	Q 1-Q 12°	10 mg max over 1 hour
(Racemic)		bronchodilator			
Levalbuterol HCI	Xopenex	"R" isomer	0.63, 1.25 mg*	Q 6-8°	Selective for beta-2
		bronchodilator			receptor sites
Salmeterol	Serevent	Maintenance	2 puffs MDI	Q 12°	Overdosage may be
Xinafoate		bronchodilator	1 puff Diskus		fatal
Metaproterenol	Alupent	Sympathomimetic	0.2-0.3 cc*	Q 3-4°	Beta-1 stimulation may
Sulfate		bronchodilator			cause ↑ H.R.
Ipratropium	Atrovent	Anticholinergic	0.5 mg liquid;	Q 6-8°	Opens larger airways;
Bromide		bronchodilator	2 puffs MDI		Inactivated by light
Atropine Sulfate	Atropine	Anticholinergic	1-2 mg*	TID or QID	Use caution with thick
		bronchodilator			secretions
Ipratropium	DuoNeb	Combination	0.5 mg	Up to 6 times	Action should last about
Bromide		bronchodilator	Ipratropium	per day	5 hours
and		(liquid)	with 2.5 mg		
Albuterol Sulfate			Albuterol base		
Ipratropium	Combivent	Combination	2 puffs	QID	Onset = 15";
Bromide and		bronchodilator			Peaks in 1-2 hours
Albuterol Sulfate		(MDI)			
Racepinephrine	S 2	Decongestant	0.25-0.5 mL*	Prn	Possible rebound effect
Dexamethasone	Decadron	Corticosteroid	1-4 mg with	Per	Rinse mouth to prevent
Sodium Phosphate			bronchodilator	bronchodilator	thrush
Fluticasone	Flovent	Corticosteroid	1-4 puffs	BID	Check strength per puff
Acetylcysteine	Mucomyst	Mucolytic	10%: 6-10 cc	Per	Do not mix with
			20%: 3-5 cc	bronchodilator	aerosolized antibiotics;
				frequency	use with bronchodilator
Xylocaine	Lidocaine	Local Anesthetic	QS 20 mg/mL	Prn	May increase Raw
			or 40 mg/mL		
Tobramycin	Tobi	Antibiotic	300 mg	BID	Pre-tx with
					bronchodilator; Do not
					mix with mucolytic

Fluticasone and Salmeterol	Advair	Corticosteroid with Maintenance Bronchodilator	1 puff of 50 mcg Salmeterol with 100, 250,	BID (12 hours apart)	Do not use as rescue inhaler; rinse mouth
		Di dilidilidana (di	or 500 mcg Fluticasone	apar ty
